

# DOXEM® NXT PRESSURIZED SOLUTIONS

Four active ingredients and Four unique modes of action

Kevin Lansdown has been in the Pest Management Industry for over 12 years, starting as a termite technician and progressing in 2020 to a Service Manager at Green Pest Services. Over the years, he's encountered various challenges but his recent discovery of Doxem NXT has truly revolutionized his approach.

For the past 6 months, Green Pest Services has been relying on Doxem NXT to address their pest control needs, primarily targeting German cockroaches and ants, but finding it effective against a variety of pests. The decision to try Doxem NXT was driven by the innovative formulation, boasting four modes of action with highly proven active ingredients, including two non-repellants, Indoxacarb and Imidacloprid, paired with two well-known IGRs, Novaluron, and Pyriproxyfen. The added bonus was the reasonable price point, making it an automatic choice for Green Pest Services.

***"We've seen quick results and believe this is due to all four active ingredients working in conjunction with one another."***

-Kevin Lansdown, Field Manager  
Green Pest Services  
Chantilly, VA

The application process is seamless with Doxem NXT's easy-to-use crack and crevice tip. This feature allows Green Pest Services to reach and treat hard-to-access areas, ensuring thorough coverage around dishwashers, appliances, wall voids, and more, without disrupting baiting efforts.

"The results have been outstanding!," says Kevin. Dealing with German cockroaches, Green Pest Services observed significant decreases in population sizes and zero reinfestations in treated areas. The effects of the IGRs are visibly apparent upon return, and with the four modes of action offering up to 180 days of control, their call-backs have seen a remarkable reduction.

"What sets Doxem NXT apart is not just its effectiveness but also its cost-saving aspect. Combining multiple products into one has helped us reduce supply costs, allowing Green Pest Services to invest that money in areas that contribute to our business growth," conveys Kevin. The four modes of action, coupled with the precision of the crack and crevice tip, have proven instrumental in achieving quick and sustainable results.

While the product has delivered exceptional results, Kevin has encountered potential surface staining in some cases. To mitigate this, he recommends testing the surface first and spot treating sensitive areas, such as cabinets.

In conclusion, Doxem NXT is a game-changer in the world of pest management. With its unique combination of active ingredients and affordability, it has earned a permanent spot in Green Pest Services inventory, effectively replacing some of their previous aerosols. Kevin highly recommends it to fellow professionals looking for an efficient and cost-effective solution.
