

TECHNICAL BULLETIN

SPOTTED LANTERNFLY

The Spotted Lanternfly has become and will continue to be, a significant problem for the pest control industry. Unfortunately, treatment options for PMPs have been limited or non-existent due to label restrictions.

To provide PMPs with treatment options, Control Solutions, Inc. (CSI) has applied for and received approval for FIFRA Section 2ee for three CSI products. While this Section 2(ee) recommendation does not change the approved EPA label language, it does allow for an exception for the Spotted Lanternfly in the listed states for the listed specific applications. The allowed rates and use directions are included in the bulletin.

If you plan to utilize DuraFlex ZC, Bifen I/T, or Dominion 2L for the control of Spotted Lanternfly in one of their approved states, be sure to keep a copy of the 2(ee) Bulletin in your possession.
