FEATURES

ACTIVES

Novaluron, Deltamethrin, Pyriproxyfen

FORMULATION: Easy to use Aerosol

D-Fense® NXT is a remarkably effective and long lasting contact aerosol. Its broad label allows applications both indoors and outdoors, on mattresses and surrounding bed frames for bed bug infestations, and in food/feed handling areas. General surface applications are also allowed. Features a flip up actuator - no searching for the right tip for the job!

Crack and crevice application: Use D-Fense NXT with the supplied actuator and injection tubes. Inject D-Fense NXT into cracks and crevices or void spaces where insects may be harboring, living or breeding. Place injector tip into cracks, crevices, holes and other small openings. Apply product for one second. For light infestations move injector tip along cracks while treating at the rate of three linear feet per second. For heavy infestations move injector tip along at one linear foot per second. For wall and equipment voids calculate the void's cubic area and treat at the rate of five to ten seconds per three cubic feet. Several holes may be required in long-running voids. Reapply once every 6 months if necessary.

Spot treatment: Apply to storage areas, closets, around water pipes, doors and windows, behind and under refrigerators, cabinets, sinks, stoves and other equipment, shelves, drawers and similar areas. Contact as many insects as possible. Hold can at arm's length and apply at the rate of 1 second per 2 sq. ft. Reapply once every 6 months if necessary.

Target pests: works against bed bugs, cockroaches, crickets, ants (see label for fleas, flies, fruit flies, gnats, hornets, mosquitoes, spiders)
